

Exercise 3

How to solve the problem of data availability?

Time: 35 minutes

Discussion

1. Please list the data elements necessary for emission calculations at city level on the cards provided. For your city or region, which of the data or part thereof are available, not available or available but not accessible: please pin the data cards on the board accordingly

Type of data	Available (which years)	Accessible	No available
Fleet data			
Street network data			
Transport activity data			

2. Please discuss how you (can) deal with data gaps.
