

## Checklist: Designing Mitigation Measure(s)

Key stakeholders actively participate in the process.

Long-list with potential NAMA options is developed.

Short-list with top priority NAMA options(s) agreed among key stakeholders.

Initial NAMA Concept Note is developed and agreed among stakeholders.

Main conceptual, information and data gaps for detailed design identified.

Detailed conceptual/technical design studies/consultancies carried out.

Mitigation measures clearly specified (direct mitigation measures, supportive measures, organisational measures).

Capacity building needs identified (at individual, organisational and system levels).

A mechanism for coordination/steering structure for NAMA development and implementation is designed, accepted by core stakeholders and operational.
